Installation:

- To set up the necessary packages, begin by running the following command in your terminal:

   Npm install

- Next, navigate to the `.env` file and input your OpenAI API key.

- After configuring your API key, execute the following command to initiate the project:

   Node app.js

- This will start the project and launch the chatbot interface.

Notes:

The uploads folder though is empty but serves a pivotal role in uploading files to the OpenAI API
